Lore ipsum is simply dummy text of the printing and typesetting industry. Lore ipsum has been the industry's standard dummy text ever since the 1500s,

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lore ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English.
